

INTERESTS FLOWERS GROWERS

Will Ask for Space to Exhibit Popular New Flowering Plants.

PROF. TAYLOR RETURNS FROM THE EAST

Flourish Preparing to Come to the Exposition for the Purpose of Making a Great Exhibit.

Prof. F. W. Taylor, chief of the Bureau of Forestry, Irrigation and Horticulture of the Transmississippi Exposition, has returned from a trip through the east to the interest of the exposition. The main object of Prof. Taylor's trip was to attend the meeting of the American Florists' association, which met in Providence, R. I., early in the month. The fact that he secured the next meeting to be held in Omaha in 1898 has already been announced.

At this meeting Prof. Taylor met all of the prominent florists of the country and interested them in the exposition and secured agreements that they would attend and make exhibits of their flowers. P. K. Pearson of Tarrytown and J. C. Vaughan, the well known Chicago florist, were especially enthusiastic about the idea of making striking exhibits. Both of these men are intensely interested in the development of the ornamental bedding plant of large leaf and brilliant bloom, which has sprung into great popularity in recent years. Mr. Pearson is the proprietor of a new house, which is said to possess the attribute so recently sought by canna growers—a brilliant yellow flower of perfect form. Both Pearson and Vaughan were anxious to secure space on the bluff tract outside of the Horticulture building, where they can make exhibits of all varieties of canna.

ARRAY OF FLOWERING PLANTS.
In addition to these, Prof. Taylor found a large number of other growers who made application for space with a view of installing exhibits of rare and beautiful flowers. These applications show that water plants of all kinds, the beautiful water lilies of all species and many other varieties will be exhibited in profusion. Bulbous plants of all species, together with rare plants grown for their foliage, will be shown in the Horticulture building with all the hues of the rainbow.

In addition to securing the next meeting of the florists, Prof. Taylor called upon the members of the executive committee of the American Seed Trade association and invited them to hold the next meeting of the association in Omaha. This association holds its meetings early in June, the meeting this year having been held at Washington, D. C. The executive committee of the association is empowered to fix the place of meeting and Prof. Taylor says he feels safe in saying that the next meeting will be held in Omaha. While talking about this subject, Prof. Taylor remarked especially about the different feeling that eastern people seem to have toward the west, and Nebraska especially, as compared with the sentiment freely expressed throughout the east on that subject a year ago. He said he had constantly been met with inquiries about the change which had taken place in conditions in Nebraska and especially as to the effect of the rise in the price of wheat would have on the state. He found a great interest in all parts of the east in the general conditions in this state and in the values of land and kindred matters.

EXPOSITION COMMITTEE MEETS.

Missouri Pacific's Switching Contract Under Discussion.

The executive committee of the exposition held a special meeting yesterday for the purpose of taking up the railway question and arriving at some conclusion respecting the matter. The three directors who are general managers of Omaha roads were invited to attend the meeting, according to the instruction of the Board of Directors to the committee. Mr. Bidwell of the Elkhorn was the only one who responded.

The question was discussed at length and in detail, Commissioner Urt of the Commercial club being called upon to take part in the deliberations. The principal feature of the discussion was the charge of \$1 per car which was contemplated in the Missouri Pacific contract. It was pointed out that this scale by which the amount of charge would be made to depend upon the number of cars handled, a uniform charge to be made to all shippers, the exposition to receive a rebate under the operation of the sliding scale.

Mr. Bidwell was very guarded in his expressions regarding the terms proposed by the Missouri Pacific contract, but said the charges "were high enough." He reviewed the circumstances of the Elkhorn's connection with the exposition-railway question and stated in effect that the Missouri Pacific had broken faith with the Elkhorn by violating the promise made under the contract. He suggested to the effect that the Missouri Pacific would consent to any reasonable arrangement for carrying the exposition's freight cars. After the Elkhorn to cross the Elkhorn tracks. After the Elkhorn to cross the Elkhorn tracks. After the Elkhorn to cross the Elkhorn tracks.

The discussion continued for some time, but no action was taken by the committee. **IT WILL BE A GREAT EXPOSITION.**
Views expressed by Architect Perkins of Chicago.

Dwight H. Perkins of Chicago, architect of the Machinery and Electricity building, is the city in connection with the supervising architects of the detail decoration of the building.

"There is one thing about your exposition," said Mr. Perkins yesterday, "that your people are to be congratulated upon, and that is the tremendous amount of work that has been done in the mechanical part of the work. Matters have reached a point where your exposition could easily be opened February 1 of next year, so far as the buildings are concerned. People who are not familiar with this class of work do not appreciate the great effect that will be produced by these large buildings, as upon the time required for their construction. If it became necessary, every building on the grounds could be completed within ninety days."

"What strikes me most forcibly in connection with your exposition," continued Mr. Perkins, "is the lack of hotel accommodations. Your people do not seem to appreciate the fact that Omaha is going to be overcrowded with a perfect horde of visitors who will require accommodations. It is not prepared to give."

"To get back to the exposition, I can truthfully say that Omaha is going to have an exposition which will compare favorably with any exposition ever held in the world and which will eclipse anything ever held on the side of the world except the World's fair, and it will compare very favorably with that from an architectural standpoint. I was delighted with the exhibition office."

Colorado Commission Organized.
The Colorado exposition commission has been organized by the following officers: President ex-officio, Governor Adams; first vice president, H. P. Steele; treasurer, Colonel Ed. P. Bishop; secretary, G. M. Mieschke; assistant secretary, Mrs. M. A.

LEASE IS ONLY TEMPORARY

Other Roads to Be Used Only While New Line is Being Built.

PLANS OF THE PITTSBURG & GULF ROAD

Railroad Men Unanimous in the Opinion that New Line Will Not Come Into Omaha Over Union Pacific Bridge.

The report that the directors of the Kansas City, Pittsburg & Gulf railroad had completed arrangements to run their trains from Kansas City to Council Bluffs over the Chicago Great Western and the Omaha & St. Louis railroads has been officially confirmed. No contracts looking toward the entrance of the new north and south line from Omaha from Council Bluffs have yet been made, but the officials of the Omaha Bridge & Terminal Railway company are of the opinion that negotiations looking toward the use of the East Omaha bridge and the operation of trains of the Pittsburg & Gulf railroad over the tracks of the local terminal company will be completed. Well posted railroad men are unanimously of the opinion that the north and south line will not come into Omaha over the Union Pacific bridge.

In a letter to The Bee, received yesterday from an official of the Kansas City, Pittsburg & Gulf railroad, he says: "You class agreements to be made with the Omaha Bridge & Terminal Railway company are of the opinion that negotiations looking toward the use of the East Omaha bridge and the operation of trains of the Pittsburg & Gulf railroad over the tracks of the local terminal company will be completed. Well posted railroad men are unanimously of the opinion that the north and south line will not come into Omaha over the Union Pacific bridge."

Shooting Up the Lagoon.
The putting in of the sheet piling which is to line the lagoon like a tight board fence was commenced yesterday. The planks are of pine, three inches thick, twelve inches wide and are tongued and grooved. They are being driven into the lagoon with white lead before the planks are put in place and they are then driven closely together, forming a watertight joint. The lower end of the piling is sawed to a point and driven into the ground about six inches. The trench is then filled up, the earth being tamped down. The piling is to be driven in a row and the water is to be kept out of the lagoon, as it was first thought might be required.

Educational Possibilities.
The educational possibilities of the brute creation have probably been known all over the land as a wonderful trainer of dogs and ponies. His company this year consists of over 100 of the handsomest specimens of their kind obtainable, all of whom have been educated to a wonderful degree of intelligence. The entire company will display their tricks in this city under a tent on Farnam street, near Eighteenth street, six nights, to begin Monday, September 6, with matinees Tuesday, Thursday and Saturday.

Night attack on Ft. Sumter—Ashland, Sept. 6. Round trip tickets 75 cents, at 1002 Farnam and 1502 Farnam.

WM. C. GOSS—COAL.

Tel. 1207. Office and yards 11th & Nicholas.

Office Teacher or Scholar

In the public schools of the United States, 15 years of age and over, should have a copy of the Northern Pacific's new and beautifully illustrated book, "Wonderland '97." It is especially adapted for use in the public schools in the study of geography and history, and as an aid in the study of the northwest and its varied and vast resources. The book has a large amount of valuable data, but is not by any means a compendium of dry statistics.

The beautiful Lake Park region of Minnesota, the Red River Valley of the North, the remarkable wheat land of the country, and the beautiful scenery of the northwest are all depicted in the book. The book is a valuable addition to the library of every teacher and scholar.

Any teacher or scholar can have a copy by sending 6 cents in postage stamps to Charles S. Fox, general passenger agent, St. Paul, Minn.

There is an opportunity which should not be lost to obtain something of interest and value almost for nothing, and our schools should reap the benefit of it.

Five Brand—New Train.
The Burlington's morning Omaha-Denver and afternoon Omaha-Chicago trains have been changed to run over the Elkhorn tracks. The chair and smoking cars as well as the sleepers are provided with wide viewable and are lighted by kerosene gas. The chair cars are also provided with smoking cars in oak. The smoking cars have reclining chairs and are finished in a style distinctly in advance of anything else of the kind attempted. Excellent lunch is served in the dining cars, which are by far the handsomest of the line.

Five complete trains are required to maintain regular service between Denver, Omaha and Chicago. Three of the new trains are now in service. The others will follow shortly.

Ticket office 1502 Farnam.
